

# STUDENT MEDICAL JOURNAL

## Science Talk April '25

Online (Zoom-Link im Linktree)

### SCIENCE TALK

Prof. Martin Boeker and Volkan Tatlikazan

**5 pm CEST 29.04.2025.**  
**From Data to Decision-Making Support**  
~ a dialogue between Computer Science and Medicine ~

### SMJ invites you to April's Science Talk: "From Data to Decision-Making Support"

Explore with us the current state and future potential of ethically and safely using data to train artificial support systems for decision-making and scientific research in medicine!

Volkan Tatlikazan, a graduate of the TUM Master's program *Software Engineering for Business Information Systems*, will present findings from his thesis, *Developing Systems for Trustworthy Medical Question Answering*. His presentation will be followed by insights from Univ.-Prof. Dr. Martin Boeker, an expert in medical informatics.

Professor Boeker (1) currently leads the Department of Medical Informatics at the TUM School of Medicine & Health. His research focuses on medical informatics and didactics, bridging the gap between data science and clinical practice.

Join us on **April 29th** to dive deeper into the dialogue between computer science and medicine—and to strengthen communication across interdisciplinary work environments.

At SMJ, each Journal Club (JC) session aims to educate and train young research enthusiasts in critical thinking and effective scientific presentation.

Each JC includes a student-led paper presentation, followed by a keynote from a special guest.

To join the event online, please visit our Linktree for the Zoom link.(2)
