

Internal Medicine (Innere Medizin):

Lectures:

There are several important interdisciplinary lectures, called Interdisziplinäre Vorlesung (IVL).

- Interdisziplinäre Vorlesung 1 (IVL 1) (only winter term)
- Interdisziplinäre Vorlesung 2.1 (IVL 2.1) (only in summer term)
- Interdisziplinäre Vorlesung 2.2 (IVL 2.2) (only in winter term)
- Interdisziplinäre Vorlesung 2.3 (IVL 2.3) (only in summer term)
- Interdisziplinäre Vorlesung 3 (IVL 3) (winter and summer term)

Internal Medicine is a topic in all of them, but the **most important ones for Internal Medicine** are **IVL 2.1 and IVL 2.2**.

The lessons of IVL 2 also contain surgery and specific pathology, so does the exam.

Practical Training:

- Course of Anamnesis and physical examination: „Spezielle Untersuchungstechniken Innere Medizin“

This course you can do once a week. You will learn how to do a correct anamnesis and physical examination.

- Practical Training: “Blockpraktikum Innere Medizin”

It contains 2 weeks of rotatory courses in different departments, as well as lessons and tutorials. It takes place 2 weeks at the beginning or the end of the term in summer or winter.

- „Bedside teaching“

You will do anamnesis, physical examination and discussion of the cases with the doctors of the department.
